How to Create Template and how to use it in Sitefinity

How to Create Template and how to use it in Sitefinity

To create a template you can use built-in layouts or you can use layout editor to build a template from scratch. If you want to create a template based on the existing one you can do that as well. Another way of creating a template is by using a master page.

If you want to edit the template, you can use the widget template editor.

To create a template, follow these steps:

Step 1: Dashboard > design > page template

Step 2: create a template

Give name and developer name (not required)

Check "Don't use template (start from scratch)"

Click on 'create **add go to add content'**
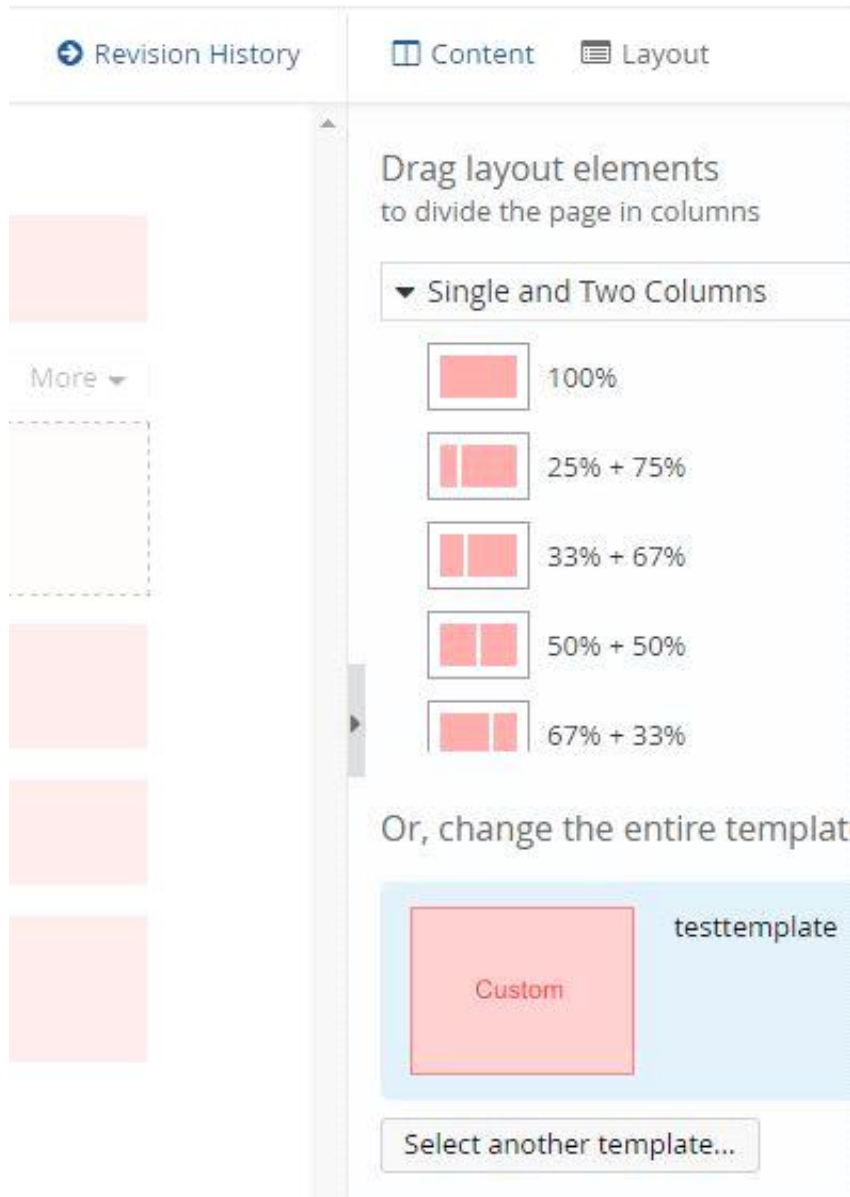

Step 3: Drag and drop widgets whatever you want

      Publish the template.

How to Use:

 Step 1: Open your page in edit mode on which you want use that template

      Go to layout (in right corner) like below

Step 2: Click on **select another template**

Select your template(it will in top of all) and click on **Done**.

Publish the page.
